Work Experience

Vighnotech

Frontend Developer Intern

February 2025 – June 2025

On-site

- Delivered lightweight, SEO-enhanced websites using **Next.js**, **TypeScript**, and **Tailwind CSS**, increasing traffic by **25%**.
- Worked closely with designers and backend developers, demonstrating strong **teamwork and communication** to build reusable components like data tables, interactive forms, and email integrations, reducing development time by **20%**.
- Collaborated with cross-functional teams to improve website performance through code optimization, lazy loading, and content structuring, achieving an **80% Lighthouse score** and enhancing user engagement.

EliteTech

Frontend Developer Intern

December 2024 – January 2025

Remote

- Crafted websites using **ReactJS** and **TailwindCSS** for **3+ clients**, ensuring **compatibility** and seamless navigation.
- Refined frontend layouts and applied performance enhancements, improving load time and boosting user satisfaction by **12%**.

Projects

WebGames | *ReactJS, Vite, Clerk, TailwindCSS, Supabase*

[GitHub](#) | [Live](#)

- Created a retro-themed **minigames website** featuring **6 playable games** with visuals and sound effects, engaging users.
- Integrated secure **Clerk authentication**, enabling match based point tracking and protected routing, improving user management efficiency by **40%**.
- Enhanced **cross-device responsiveness**, improving accessibility, and introduced **leaderboards** using supabase database service to increase user competitiveness and retention by **20%**.

BookCircle | *ReactJS, TailwindCSS, SpringBoot, PostgreSQL, Botpress, Google Books API*

[GitHub](#) | [Live](#)

- Created a full-stack **e-commerce platform** for pre-owned books, promoting sustainable reading and helping reduce the **millions of books discarded annually**.
- Added **categorical search**, personalized recommendations, Google Books API with millions of titles, **AI-powered chatbot**, and a email service improving user experience by **40%**.
- Engineered backend with authentication, profile management, and ordering system, improving checkout success rate by **20%**.

Resume Builder | *Next.js, TypeScript, TailwindCSS, Redux Toolkit, Express.js, Postgresql*

[GitHub](#) | [Live](#)

- A full-stack web app enabling users to create, edit, and download resumes with live previews with **3 customizable templates**.
- Designed an intuitive and responsive interface with section customization, template switching, and styling options, increasing user retention by **40%**.
- Implemented user management and authentication with persistent data storage using **Supabase (PostgreSQL)** and **Express.js**, improving backend efficiency by nearly **50%**.

Education

Thakur College of Engineering and Technology

B.Tech in Artificial Intelligence and Data Science

November 2022 – July 2026

8.19 CGPA

Leadership & Involvement

- Contributed to **Hacktoberfest 2024** with **5+ merged PRs**, showcasing collaborative open-source development and Git workflows.
- Solved **200+ Data Structures and Algorithms** questions using Java language.
- Produced **20+ technical videos** for **Shastra Coding Club & S4DS Club**, simplifying complex programming concepts.
- Served as lead editor for **Pragyaan** (Department magazine), managing content creation and student story development.
- Qualified for the college-level **Smart India Hackathon**, leading website development and UI/UX efforts.
